# Rapid response for business continuity with Cisco Webex

**Activate Cisco Webex with the complete Meeting and Calling experience to quickly enable flexible working practices. Maintain the office experience for your employees working from home or any other location. Cisco Webex delivered by NTT Ltd. keeps your teams connected.**

NTT Ltd. are supporting the Cisco initiative in providing free access to its Webex Calling and Meetings services for a period of 90 days with the NTT voice services. As a Cisco Tier 1 partner, NTT Ltd. can enable your teams with the market leading calling and collaboration solution with a view to simply transition to a live full suite after the trial period.

When it comes to keeping people and teams connected, NTT Ltd. can deliver Webex Meetings and Calling providing the call plans for key users within the enterprise.

Webex Calling only requires a PC/mobile device with an internet connection to function. Users have the landline number to make and receive calls wherever they are, without being tied to a physical location or device.

**Webex Calling**  
Cloud Calling

- Enterprise Class PBX
- Call Plans in 24 Countries
- Full Cloud Service
- Monthly 120 min domestic calls per user, included

**Webex Meetings**  
Conference audio included

- HD Audio & Video Conferencing
- Content & Multimedia sharing
- One click to connect
- Toll Dial in audio included from 62 destinations

## Keeping teams connected. Meet, message and call regardless of location.

Your business does not need to be currently subscribed to any Cisco Webex services in order to use the trials available. If however you use Webex Meetings, Webex Calling can simply be added and will operate independently of your core meeting service.

Trial services operate for up to 90 days with no commitment to buy for enterprises requiring 25 – 50 users.

Full Cisco Webex services are available now or can be activated after the trial licences expires.

### Webex Meetings

A Webex meetings trial quickly mobilizes a business and their users with the market leading meeting solution. Users will be provisioned and on-boarded with documentation to simply get your teams up and running.

### Webex Calling

Typical enterprise voice deployments are complex and costly; with our own voice network and in these times of need we have streamlined the approach to enable voice in 4 steps:

- 1 Free remote technical readiness consultation
- 2 Number delivery and provisioning
- 3 Remote customer onboarding literature delivered
- 4 Post delivery review

**This process includes onboarding of the numbers, as well as the initial consultation. The consultation is free of charge.**

Our calling plans for domestic PSTN replacement service are available in 24 countries with business continuity backed by NTT's lowest latency network.
